Mixed Sizes?

- ❑ Add dimensions for mixed shipments by number of groups
- ❑ All dimensions within each group must be similar, but each group can be different from one another.
- ❑ Individually unique items can be added one-by-one.

The screenshot displays the EQUIPT web application interface. At the top, the title 'EQUIPT' is centered. Below it, a navigation bar includes 'Lever' and 'Glossary'. A large white checkmark is overlaid on the top right of the interface. The main content area is titled 'FIND WHAT FITS' and contains three sections: 'Shipment Type' with radio buttons for 'Pallets' (selected), 'Pieces', and 'Mixed Sizes?'; 'Loading Type' with radio buttons for 'Dock High' (selected), 'Ground Level', and 'Enclosed Only'; and 'Enclosure Type' with radio buttons for 'All' (selected), 'Enclosed Only', and 'Open Only'. A blue button labeled 'Select "Pieces" for individual items or "Pallets" for standard pallet sizes' is positioned below these sections. The 'Enter Dimensions' form is shown in two states. The left state shows a single group with 'Number of Items' set to 1, and input fields for Length (48.00), Width (40.00), Height (40.00), and Total Weight (0.00). The right state shows two groups. Group 1 has 'Number of Size Groups' set to 2, and input fields for Quantity (1), Length (0.00), Width (0.00), Height (0.00), and Weight (0.00). Group 2 has 'Number of Size Groups' set to 1, and input fields for Quantity (1), Length (0.00), Width (0.00), Height (0.00), and Weight (0.00). A large white plus sign is overlaid on the right side of the form. A 'Roll On!' button is located at the bottom of each form state.
